

GROWING AGRICULTURE *together.*

FEED PRODUCTS

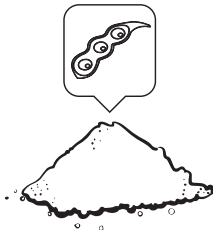

Food safety in America has become increasingly important as consumers continue to demand higher quality foods to be placed on their table. For the livestock producer, that means the products they deliver to the market must meet the highest quality standards.

COMMON FEED INGREDIENTS

Some of the main ingredients for feed include corn, soybean meal from soybeans, dried distillers grains, vitamins and minerals.

CORN

SOYBEAN MEAL

DISTILLERS

VITAMINS

MINERALS

CATTLE

Corn, Hay/Grass, Distillers, Silage Vitamins, & Minerals

PIGS

Corn, Soybean Meal, Dry Distillers, Vitamins, & Minerals

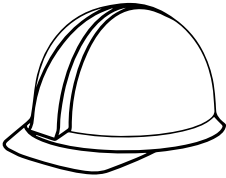

POULTRY

Corn, Soybean Meal, Wheat Midds, Vitamins, & Minerals

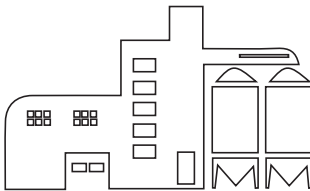

SAFETY

Because the food industry is so stringent on their policies for food safety, mills must take a lot of steps to ensure that the feed they produce is safe for consumers. FEED safety is a top priority because what it truly means is FOOD safety.
