

GROWING AGRICULTURE *together.*

Name: _____

PROPANE IN AGRICULTURE

On the farm, propane is used for many things. It keeps irrigation engines running, helps dry grain, and makes barns more comfortable for our animals by keeping them warm. The top five states that use the highest amount of propane for agriculture are listed below. Match the shape to the map and use a purple crayon to color in the five states on the map.

Top States by Agriculture Annual Propane Consumption (million gallons)
