

GROWING AGRICULTURE

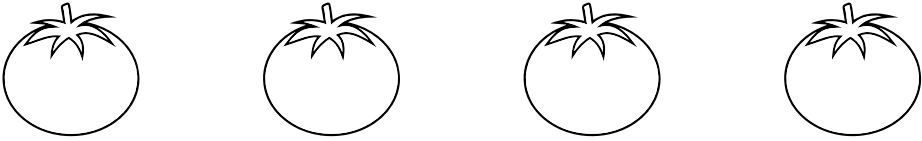

together.

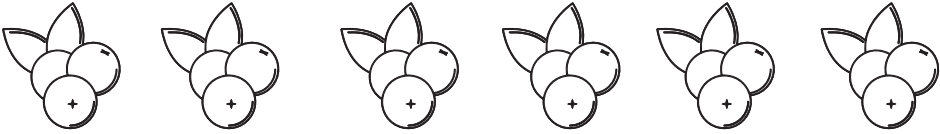

Name: _____

SPECIALTY FEED

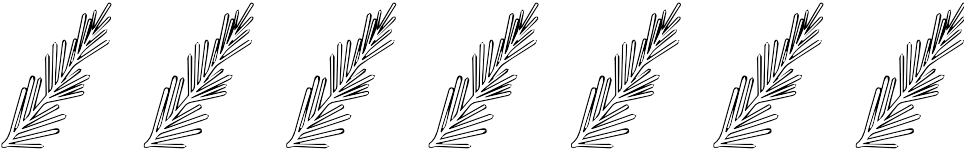

Sometimes, specialty feeds require ingredients grown outside a cooperative's trade territory such as carrots, dried cranberry, dried blueberries, rosemary, thyme, and dried tomato. But the base feed stock ingredients, such as alfalfa, are often still locally grown products. Look at the pictures of some of the specialty feed ingredients below and count how many are pictured on each line.

THYME		
--------------	--	--

TOMATO		
---------------	---	--

CRANBERRY		
------------------	--	--

CARROTS		
----------------	--	--

ROSEMARY		
-----------------	--	--

BLUEBERRIES		
--------------------	--	--
