

# GROWING AGRICULTURE *together.*

## EQUIPMENT SAFETY

Farm equipment is big, like really big. And because the equipment is so massive in size and horsepower, farmers must take safe steps when operating machinery to protect themselves and others on the farm. Different safety measures may be needed depending on the equipment being used.

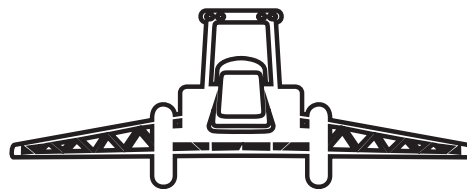

### LARGE FARM EQUIPMENT

Some examples of farm equipment that can be used for different seasons or tasks.

#### TRACTOR

Used for planting crops

#### SPRAYER

Used for applying chemicals & nutrients to crops

#### COMBINE

Used for harvesting crops

### OTHER EQUIPMENT

Additional equipment used on the farm.

#### ATV/UTV

Small vehicle that can maneuver through fields

#### PTO SHAFT

Transmits power from tractor to an implement.

#### SKID LOADER

Small machine with large bucket lift for moving product

#### PIVOT

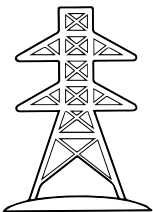

Crop irrigation that rotates in a circular motion.

#### AUGER

Rotating screw blade that helps with transporting grain

### BE ON THE LOOKOUT

Farmers must take the time to look for these items when operating large machinery.

#### ELECTRICAL LINES

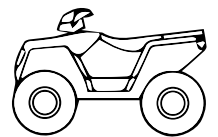

#### PEOPLE & ANIMALS

#### TERRAIN CHANGES

#### WEATHER
